I. Purpose

The purpose of this procedure is to define a process for the control and accountability of offender self-administered medications observed by correctional officers.

All medications for offender self-administration are specific for that offender, and are considered the offender’s personal property. Medications are secured under a lock and key in an environment that maintains the integrity of the medication. All medication encounters for offender self-administration are documented/recorded on the “Community Corrections Supervised Medication/Syringe Count Log” (DOC 140130J). Correctional officers observing offender self-administration of drugs are not responsible for any adverse medical events that may occur following offender self-administration. All medical evaluations and interventions are the responsibility of medical, dental, or mental health providers, or qualified health care professionals of the host facility.

II. Definitions

Administration - Administration of a medication is defined as the direct application of drug, whether by ingestion, application, inhalation or any other means, to the body of a patient/offender by a health professional licensed to administer medications in Oklahoma.

Self-Administration – Direct administration of drugs by the offender.

Issuance - The provision or distribution medications for self-administration. This includes dose-by-dose offender self-administration, and/or issuance of medications for Keep-On-Person (KOP). Non-healthcare staffs (e.g., correctional officers) are permitted to issue medications for offender self-administration.

III. Nurse Responsibility
1. Obtain the medical, dental, mental health provider's order for the medication and send order to the contract pharmacy provider.

2. Receive medications and check against the medical, dental, mental health provider's order.

3. Fill out the “Community Corrections Supervised Medication/Syringe Count Log” (DOC 140130J) with offender name and DOC number, medication name, prescription number, and instructions for issuing the medication. The starting quantity is listed on the top and as the doses are self-administered they are subtracted in the balance column. The balance remaining must always match the amount/quantity on hand. Insulin quantity issued will be one vial, and is exempt from the running balance count.

4. Place the medications and the “Community Corrections Supervised Medication/Syringe Count Log” (DOC 140130J) form in a manila envelope with the offender name and DOC number written clearly on the outside of the envelope.

5. At Community Corrections Centers, Nursing will verify the balance count is correct each day.

6. Provide patient education concerning the medication and how to take it.

7. Restock medication as needed.

8. Remove the card and the sheet upon completion of the medication or if the offender no longer wishes to take the medication.

9. Answer any questions raised by the patient or by the correctional officer concerning the medication.

IV. Correctional Officer Responsibility Observation of Offender Self-administration:

1. Verify the offenders ID matches the name and DOC number on the medication container/package.

2. Take the manila envelope with offenders name and DOC number from the secured site.

3. Hand the offender the medication and the “Community Corrections Supervised Medication/Syringe Count Log” (DOC 140130J).

4. Observe the offender taking the medication and signing the “Community Corrections Supervised Medication/Syringe Count Log” (DOC 140130J). Ensure the offender takes the correct dose prescribed by the medical provider. If the directions state: “Take one tablet twice a day then the offender is to take one tablet in the morning and one at night.” Only the prescribed dose is to be taken at the prescribed time. If the offender misses the morning dose, they are not to take an extra tablet to make up for the missed dose.

5. Co-sign verification of count on the “Community Corrections Supervised Medication/Syringe Count Log” (DOC 140130J) for controlled substances.
6. Return the “Community Corrections Supervised Medication/Syringe Count Log” (DOC 140130J) and medication to the manila envelope.

7. When not in use, secure medication under lock and key, double lock if it is a controlled substance.

Fingerstick Observation (Blood Sugar Monitoring):
1. Provide offender with Glucometer, Strip, and Lancet.
2. Observe offender performing fingerstick.
3. Ensure that the lancet is placed in sharps box.

Insulin Injection Observation:
1. When not in use secure insulin syringes under lock and key.
2. Verify the offenders ID matches the name and DOC number on the medication container/package.
3. Have offender sign-out syringe on the “Community Corrections Supervised Medication/Syringe Count Log” (DOC 140130J).
4. Hand syringe to offender.
5. Staff co-sign verification of count on the “Community Corrections Supervised Medication/Syringe Count Log” (DOC 140130J).
6. Observe offender draw up and self-administer insulin, and document on the “Community Corrections Supervised Medication/Syringe Count Log” (DOC 140130J).
7. Witness used syringe is placed in sharps container.
8. Notify medical when sharps container is ¾ full, and a new sharps container will be issued.

KOP Issuance:
1. Verify the offenders ID matches the name and DOC number on the medication container/package.
2. Have offender sign pharmacy drug manifest as proof of receipt.
3. Fax completed manifest to host facility health administrator.
